March 2019

Current Stage

Founded in 2009 and headquartered in Singapore, Enjin is an information technology company with a wide range of products. On its blog, in early March, the team announced a beta version of their blockchain, SDK, will be released for use by developers at the Game Developers Conference 2019 in San Francisco. Enjin has partnered with dozens of games this year, such as "War of Crypto", "Forest Knights", and more. By working with Unity and NRG eSports, Enjin has been rewarding more fans and attracting new users to its ecosystem. Additionally, recent reporting has mentioned that the company is collaborating with South Korean technology giant Samsung. The team is currently adding new features to support more advanced project systems on the platform. In its next development phase, scaling speed and scalability will be a major area of focus.

Risk

Enjin is the largest online game community development platform. Enjin Coin provides a game community protocol that allows players, content providers, and game publishers to contribute to the gaming community. Game community teams are attracted by platform's accumulated users through years, as well as the potential of being recognized by even more users. The pre-sales in its crowd funding accounted for a relatively high proportion of the total amount of tokens, while the distribution of tokens is even more concentrated today.

Summary

Team

Co-Founder & CEO, Maxim Blagov

- Jan 2008 - Present: CEO / Creative Director & Co-Founder at Enjin
- Computer Science, University of Technology Sydney
- Computer Science, University of Sydney

CTO, Witek Radomski

- Mar 2009 - Present: CTO at Enjin

Project

Enjin is a decentralized platform to manage, distribute, and trade virtual goods. Giving gamers and content creators a new model of virtual ownership, Enjin Coin is the first cryptocurrency with an authentic purpose for online gamers.

Public API

Enjin will host a public Platform API using the JSON-RPC protocol with methods for checking account balances and accessing each of the smart contracts.

The Enjin 'Smart' Wallet

Building on existing light wallet design, the Enjin Wallet streamlines the user experience further by integrating with games and websites that the user trusts.

Ecosystem

Market Cap: \$ 32,630,280

Ranking: 151

EnjinCoin Adoption: 6 months following the EnjinCoin crowdsale and the deployment of the wallet and core ENJ features, tokens were slowly released to approximately 30,000 verified gaming communities on Enjin. The amount of tokens each community receives was calculated based on their previous store volume sales, member counts, audience visits, and various website activity metrics.

AAA: The technical foundation is extremely solid and project risk is extremely low.

AA: The technical foundation is very solid and project risk is very low.

A: The technical foundation is solid and project risk is relatively low.

BBB: Technical feasibility is very good and project risk is controllable.

BB: Technical feasibility is good and the risk of the project is moderately controllable.

B: Technical feasibility is moderate and project risk is limited to a controllable extent.

CCC: The technical foundation or idea has certain problems and the project has relatively large risks.

CC: The technical foundation or idea has considerable problems and the project carries large risks.

C: The technical foundation or idea has substantial problems and the project suffers from extremely large risks.

D: The project is riddled with problems and carries an extremely high risk of failure.
