Current Stage

The short-term objectives are well achieved in terms of development progress. By the end of 2018, the first generation of Genesis Vision (GV) had been largely completed. At present, the GV Blockchain platform has been ready to use, client development has been completed, cooperation with more than 100 market makers has been achieved. But the stock trading market is not mature yet, and the foreign exchange function has not been realized. For the long run, GV has launched an updated white paper and will build its own block network of DAG structure in the future. Due to the limited number of exchanges and managers, integrating the asset management market and reducing trading friction are still long-term goals for.

In terms of the asset management scale, the total amount of investment on the GV platform is 67,105.71GVT (about 267,080.73USD), and the total number of investors is 1,862, which is very small compared with that of traditional asset management institutions.

Genesis Vision 2018 Performance

Genesis Vision 1.0 version

✓ Basically Completed

1 The GV platform is currently based on the Ethereum blockchain network and has realized basic functions such as registration of private assets and transactions.

Establishment of Genesis Market, a platform gathering both traditional and digital assets

✓ Partially Completed

2 Genesis Markets Terminal has been released, the built-in digital asset trading platform can be used, but the user experience is average. The forex and stock trading business is still under development.

Client 1.0 version

✓ Completed

3 The web version and mobile version (iOS and Android) clients have been accessible, enabling basic trading, investment and information search functions, with 5,000+ downloads.

Market makers incentive program

✓ Partially completed

4 Partnerships with a number of liquidity providers have been reached, but user activity and transaction depth in the GV market remain to be developed.

GENESIS VISION

Risk

Genesis Vision is a private trust management marketplace based on blockchain technology and smart contracts. Its mobile application has already been launched. However, compared to the goal of 100,000 investors and 50 Billion USD trading volume in which the project has claimed to reach, the current progress is lacking and the project still needs great effort to meet its goal.

Summary

Team

CEO, Dmitry Nazarov

- 2017 - 2018: CTO of Genesis Vision
- 2017 - 2017: Software Developer at International Atomic Energy Agency
- 2016 - 2017: Software Developer at DataArt

Head of Product Development, Ruslan Kamensky

- 2016 - 2017: Software Engineer at QuantBrothers
- 2015 - 2016: Senior Backend Developer at EPAM Systems
- 2013 - 2015: Principal Software Developer at Saint Petersburg Stock Exchange

Project

Genesis Vision Participants

The project consists of investors, brokers, and managers. Each manager in the Genesis Vision network has his own cryptocurrency. The size of the issue depends on successful trade statistics. The process of transferring funds to the manager is carried out by buying a manager's cryptocurrency on the internal exchange.

Internal Exchange of Managers' Cryptocurrencies

Internal exchange within the Genesis Vision platform allows investors to purchase and sell manager coins. Managers have a limited amount of coins, which depends on their level. Initially, these coins can only be purchased directly from the manager for a fixed price. Afterwards, they can be freely traded among the investors on the internal exchange. In this case, investors set their own price for their managers' coins. The cost of these coins will depend on the success of a manager's trading because each manager's price is linked to the profitability of his/her coins.

Ecosystem

Market Cap: \$ 22,664,988

Ranking: 203

Allocation

GVT for sale (75% of total) Bounty, marketing, advisers (9% of total) Team Tokens (11% of total) Genesis Vision Fund (5% of total)
