Risk

GXChain is dedicated to building a reliable data exchanging network, maintaining partnerships with several giants such as China Unionpay and China Unicom. Most of the team members are tech-oriented but their academic strengths still remain to be seen. The risks come from the large proportion of tokens that the foundation currently holds as well as unrevealed use of funds.

Summary

Team

Founder & CEO, MQ Huang

- Aug 2016 - Present: CEO & Founder at GXChain
- Aug 2014 - Dec 2016: CTO at Hakim Information Technology Co., Ltd
- Aug 2008 - Jul 2014: CTO at Insigma Internet
- 2003 - 2007: Bachelor of Science (BS) in Computer Science

Co-Founder, Andy Tu

- Aug 2016 - Present: Co-Founder at GXChain
- 1991 - 1995: Hunan University

CTO, Charles Wang

- Jan 2017 - Present: CTO at GXChain
- Bachelor in Software Engineering, Zhejiang University of Technology

Project

GXChain is a public blockchain for data exchange, supporting the exchange of data up to a million times per second. Besides, GXChain also supports App development. Apps developed on GXChain will be greatly supported by big data among various fields.

Consensus Mechanism

Mix of DPoS and DPoS. DPoS requires holders to vote for 'delegates', who are then responsible for validating transactions and maintaining the blockchain. DPoS is developed by GXChain, aiming to solve the imbalance of exchange of data between big companies and small companies.

High-performance and Expandable

GXChain is capable of processing 10,000-100,000 transactions per second, with a 3 seconds blocktime. Considering the growing demand of on-chain business, GXChain can expand horizontally, enabling even higher transaction speeds without a hard fork.

Ecosystem

Market Cap: \$ 73,517,426

Ranking: 82

GXS Token:

GXS is the essential media to connect businesses, customers, and developers. It is circulating for multiple services on GXChain such as data exchanging. Payments for using applications on the GXChain ecosystem will be settled by GXS.

AAA: The technical foundation is extremely solid and project risk is extremely low.

AA: The technical foundation is very solid and project risk is very low.

A: The technical foundation is solid and project risk is relatively low.

BBB: Technical feasibility is very good and project risk is controllable.

BB: Technical feasibility is good and the risk of the project is moderately controllable.

B: Technical feasibility is moderate and project risk is limited to a controllable extent.

CCC: The technical foundation or idea has certain problems and the project has relatively large risks.

CC: The technical foundation or idea has considerable problems and the project carries large risks.

C: The technical foundation or idea has substantial problems and the project suffers from extremely large risks.

D: The project is riddled with problems and carries an extremely high risk of failure.

TokenInsight only conducts evaluations based on quality and risk for the token projects examined, and does not make evaluations with regards to investment or valuation. For this reason, TokenInsight reports do not function as a reference for token investment.
