Risk

Ripio Credit Network is a P2P loan platform based on Ethereum. Currently, the product has not yet been released and its product design is not very innovative.

Summary

Team

Founder, Sebastian Serrano

- 2017 - Present: CEO and Founder of Ripio Credit Network
- 2017 - Present: CEO and Founder of Ripio Credit
- 2007 - Present: Co-Founder of devsAr

CTO: Antonio Ceraso

- 2017 - Present: CTO & Lead Blockchain developer
- 2012 - Present: Developer of VHGroup

Project

RCN is a global credit network based on co-signed smart contracts that connect lenders and borrowers located anywhere in the world and on any type of currency.

Co-Signer - Acts as a guarantor for Borrowers, and may act as a local agent in the Borrower's country of residence for debt collection in the event a Borrower defaults.

Credit Exchange - Allows the Lender's offer to extend credit to match with a Borrower's request for credit via a smart contract generated by the Wallet Provider.

Lender - Invests by lending funds via a Credit Exchange. Lenders can choose how much guarantee to be purchased from the co-signer (from 0-100%).

RCN token allocation:

- 42.5% for pre-sale maximum
- 8.5% for crowd sale minimum
- 15% to incentivize agents for bootstrapping the network
- 34% for fund previsions

Ecosystem

Market Cap: \$ 11,055,742

Ranking: 372

RCN tokens are:

- required for lenders to access the platform
- used to compensate agents, the more usage the Ripio Credit Network has, the more valuable RCN tokens should be

AAA: The technical foundation is extremely solid and project risk is extremely low.

AA: The technical foundation is very solid and project risk is very low.

A: The technical foundation is solid and project risk is relatively low.

BBB: Technical feasibility is very good and project risk is controllable.

BB: Technical feasibility is good and the risk of the project is moderately controllable.

B: Technical feasibility is moderate and project risk is limited to a controllable extent.

CCC: The technical foundation or idea has certain problems and the project has relatively large risks.

CC: The technical foundation or idea has considerable problems and the project carries large risks.

C: The technical foundation or idea has substantial problems and the project suffers from extremely large risks.

D: The project is riddled with problems and carries an extremely high risk of failure.

TokenInsight only conducts evaluations based on quality and risk for the token projects examined, and does not make evaluations with regards to investment or valuation. For this reason, TokenInsight reports do not function as a reference for token investment.
