Current Stage

Etherparty is in the process of continuously updating Rocket, which is in version 1.3. The Rocket 2.0 and STO platform are expected to launch soon. Although there is a big gap between actual progress and the white paper roadmap, Etherparty has successfully launched Rocket and Comet. Hero and Saturn are also expected to launch soon. These are only available in the web version, with no existing mobile app.

Etherparty 2018 Performance

Mobile App

x Uncompleted

The roadmap indicates that the mobile app will be launched, but currently Etherparty's products only support the web version.

Q2

Contract Template

x Uncompleted

The roadmap indicates that the contract template of the smart contract will be extended and the template library will be built. However, there is no updated information.

Front-end System, User Interface

x Uncompleted

The roadmap indicates that the front-end system's drag-and-drop contract functionality will be implemented. The user interface and user smart contract construction are also scheduled for further development. However, these are yet to be completed.

Risk

Etherparty aims to provide smart contract creation tools to reduce the cost of setting up customized tokens for projects. However, its products have limited application scenarios and its App version is not launched as planned in its roadmap currently.

Summary

Team

Founder & Head of R&D, Lisa Cheng

- 2015 - Present: Founder of Etherparty
- 2013 - Present: Founder of The Vanbex Group
- 2009 - 2011: President, Applications and Commerce of AOL

CEO, Kevin Hobbs

- 2015 - Present: CEO of The Vanbex Group, Vanbex Ventures, Etherparty Smart Contract Inc, Genisys Ventures
- 2010 - 2014: Field, Ensign Energy Services
- 2010 - 2013: Business Administration and Management, General, Dalhousie University

Project

Product: Rocket

Rocket is the token creation platform designed for entrepreneurs and business owners. Customers are able to follow a step-by-step process, paired with Etherparty customer support, to launch and track their token generation event.

Etherparty Wallet

The Etherparty Wallet is a custodial wallet with private keys held in the Etherparty Vault. The Etherparty Platform is designed to be powered with FUEL tokens only from the Etherparty Wallet.

FUEL Token

FUEL is a transferable ERC-20 compliant digital token deployed on the Ethereum network, and is the in-App media of exchange that powers the Etherparty platform.

Ecosystem

Market Cap: \$ 5,855,555

Ranking: 429

Token Allocation

- 40% (400,000,000): sold by the Company to pre-Crowdsale purchasers
- 40% (400,000,000): sold by the Company to Crowdsale purchasers
- 10% (100,000,000): reserved by the Company to incentivize community
- 5% (50,000,000): sold directly on the platform
- 5% (50,000,000): distributed by the Company to the Etherparty team.

AAA: The technical foundation is extremely solid and project risk is extremely low.

AA: The technical foundation is very solid and project risk is very low.

A: The technical foundation is solid and project risk is relatively low.

BBB: Technical feasibility is very good and project risk is controllable.

BB: Technical feasibility is good and the risk of the project is moderately controllable.

B: Technical feasibility is moderate and project risk is limited to a controllable extent.

CCC: The technical foundation or idea has certain problems and the project has relatively large risks.

CC: The technical foundation or idea has considerable problems and the project carries large risks.

C: The technical foundation or idea has substantial problems and the project suffers from extremely large risks.

D: The project is riddled with problems and carries an extremely high risk of failure.

TokenInsight only conducts evaluations based on quality and risk for the token projects examined, and does not make evaluations with regards to investment or valuation. For this reason, TokenInsight reports do not function as a reference for token investment.
