Current Stage

Nucleus Vision is an end-to-end technology solution, which provides business data to support retailers and physical stores through its proprietary blockchain and real-time sensor technology.

In terms of technology development, Nucleus Vision has finished developing basic sensors and software. Nucleus Vision is currently focusing on the development of higher level software.

In terms of marketing, Nucleus Vision has cooperated with many shopping malls in India and has started talking to companies in other Asian countries for cooperation.

Nucleus Vision 2018 updates

- 1 Technology Research and Development
Developed blockchain-based customer licensing network and 5 additional new technologies. Nucleus Vision also applied for related patents.
- 2 Developer Community
Hosted the world's largest blockchain hackathon, Genesis Hack, to build a stronger blockchain developer community.
- 3 Business Partnership
Signed a cooperation agreement with Korean company ZOYI Corporation, to expand its business scope in Asia.
- 4 Launch nCash Pay
In December 2018, Nucleus Vision launched nCash Pay, a new payment solution that allows merchants to accept nCash Tokens from customers.

NUCLEUS VISION

Risk

Nucleus Vision provides retailers with customer data through ION sensors and blockchain technology, enabling retailers to better serve their customers. At present, the project development progress is slow and is not completed according to its development roadmap.

Project

Nucleus' goal is to connect brick and mortar businesses closer with their customers, through IOT sensor technology & tokens. Upon entering a store, Nucleus sensors register the customers phone and prompts them to share their information with the store in reward for tokens. Nucleus tokens can then be exchanged for discounts within the store. In spite of booming e-commerce, offline retail still makes up for a majority commercial transactions. By connecting the crypto economy with brick and mortar businesses, tokens getting a real utility which is certainly the next step in crypto adoption.
