Current Stage

Mainframe has released Onyx, a decentralized communication application based on its platform. Other applications of the platform are in the process of development. Meanwhile, the platform also plans to encourage the development of the platform ecosystem by means of token incentives. However, due to the relatively slow progress of MainframeOS development, the ecology of the platform is difficult to achieve the expected scale in the short term. In summary, TokenInsight maintains the original rating B for Mainframe and the outlook is stable.

TokenInsight provides customized service such as project code analysis and project community analysis, etc. For more information, please contact bd@tokeninsight.com or visit tokeninsight.com

Mainframe 2018 Performance

- Erebos Swarm JS Library**
✓ Partially Completed
The company has released Erebus v0.6. It is a new version of Signature keys and HTTP headers in the new Erebus, as well as new packages(keccak256 & secp256k1), and new features including request timeout, more feed APIs and options, etc.
- Mainframe OS**
✓ Partially Completed
The Mainframe OS system has been updated to V0.2, and new changes include modifying the data structure to make it easier to make internal changes in the Mainframe OS.
- Mainframe OS Developer Edition**
✓ Completed
The Developer Edition has been finished and would be released in April, which includes easy installation of Mainframe OS, and documentation, tools, and sample code for creating and deploying decentralized apps.
